

Sarah is a commercial building company with a family history of over 60 years in construction. Our priority is the health, safety and wellbeing of our employees, subcontractors, customers, consultants, visitors and the general public.

We believe that all workplace injuries and incidents can be prevented. Our goal is to ensure that everything we do is planned and controlled so that we eliminate hazards and minimise risks to health and safety, including psychosocial hazards and risks, so far as is reasonably practicable.

To achieve our goal, we will:

- ✓ Identify, communicate and monitor health and safety objectives and performance measures.
- ✓ Develop, maintain and continuously improve our systems and processes, to ensure safe and healthy working conditions for the prevention of work-related injury and ill health.
- ✓ Understand and fulfil all legal requirements, other requirements and industry standards relating to health and safety.
- ✓ Foster a culture of consultation, collaboration, and participation of workers.
- ✓ Empower our people to stop any activity they think has the potential to cause harm.
- ✓ Develop, foster, and celebrate safety leadership across all activities and stakeholder groups.
